

ATHIL HISHAM

Software Developer | Python | Full-Stack | Backend | Frontend

+91 8943544897 | athilhishamcym@gmail.com | Wayanad, Kerala | [linkedin.com/in/athil-hisham](https://www.linkedin.com/in/athil-hisham) | github.com/OxxY-ScoobY

TECHNICAL SKILLS

Languages

Python, Java, C, C++

Web & Backend

Flask, FastAPI, REST APIs, HTML5, CSS3, JavaScript, Angular

Databases

MongoDB Atlas, Firebase (Firestore), NoSQL

AI / Computer Vision

YOLOv8, OpenCV (basic), Prompt Engineering (ChatGPT, Gemini, Copilot)

Tools & Platforms

Git, GitHub, VS Code, PyCharm, Raspberry Pi (IoT), Linux CLI, Excel

EDUCATION

B.Tech – Computer Science & Engineering

Ilahia College of Engineering and Technology
2022 – 2026 | CGPA: 7.25

Higher Secondary (Computer Science)

VIJAYA HSS, Pulpally | 2022 | 76%

Secondary Education (X)

VIJAYA HSS, Pulpally | 2020 | 94%

CERTIFICATIONS

- Front-End Development with Angular – NeST Digital Academy
- Introduction to Generative AI – Microsoft
- Programming in Java – NPTEL (66%)
- Python 3 Bootcamp – Udemy

LANGUAGES

English (Professional)
Malayalam (Native)
Hindi (Conversational)

PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering graduate (2026) with hands-on experience building full-stack and backend web applications using Python, Flask, FastAPI, and Angular. Proficient in designing REST APIs, working with NoSQL databases (MongoDB, Firebase), and applying OOP and data structures principles in real-world projects. Experienced with IoT systems, computer vision (YOLOv8), and version control using Git/GitHub. Actively seeking a Software Developer, Python Developer, Backend Developer, or Full-Stack Developer role.

WORK EXPERIENCE

Front-End Development Intern — NeST Digital Academy *Mar 2025 – Apr 2025*

- Developed responsive, component-based web interfaces using HTML5, CSS3, JavaScript, and Angular, applying data binding and modular architecture patterns.
- Practised collaborative version control with Git and GitHub in a team environment, resolving merge conflicts and maintaining a clean commit history.
- Gained practical exposure to Agile development workflows, sprint planning, and professional software delivery practices.

PROJECTS

Smart Shopping Cart System (Cartify GnG)

FastAPI · MongoDB · Angular · YOLOv8 · OpenCV · Raspberry Pi

- Architected an event-driven smart cart system using Raspberry Pi, YOLOv8 object detection, and load cell sensors for automated item identification and billing.
- Designed a REST API backend (FastAPI + MongoDB Atlas) to handle real-time cart events, item verification, dynamic pricing logic, and user-cart synchronisation.
- Built an Angular front-end dashboard consuming the REST API to display live cart state, item additions, and billing summaries.

Grab & Go – Supermarket Assistant Web App

Flask · Firebase · HTML/CSS/JavaScript

- Co-developed a smart retail web application with real-time shopping lists, location-based in-store guidance, and a live offers feed using Flask and Firebase Firestore.
- Implemented multi-modal sensor fusion (computer vision + weight sensors) to improve product detection reliability for fixed-weight and variable-weight items.
- Designed a RESTful Flask backend with Firestore integration, enabling real-time data synchronisation across multiple client sessions.

ACHIEVEMENTS & ACTIVITIES

- Participated in college-level hackathons and tech fests; collaborated in team-based problem-solving under time constraints, designing and prototyping software solutions end-to-end.
