ATHIL HISHAM

Software Developer | Python | Backend | Full-Stack
Wayanad, Kerala, India | +91 8943544897 | athilhishamcym@gmail.com | linkedin.com/in/athil-hisham | github.com/OxxY-ScoobY

PROFESSIONAL SUMMARY

Software Developer and B.Tech Computer Science graduate (2026) with 2 production products shipped, 2 deployed full-stack projects and 4 certifications, delivering full-stack and backend products with Python, Flask, FastAPI, Angular, REST APIs, MongoDB and Firebase. Currently shipping features for a commercially launched ERP product and an AI-assisted security operations platform at MINTS Global. Built and deployed an end-to-end IoT + computer-vision retail system. Strong in OOP, data structures, API design, NoSQL, Git, CI/CD, cloud deployment and Agile delivery.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript
Backend: Flask, FastAPI, REST API Design, Event-Driven Architecture, Real-Time Systems, Next.js
Frontend: Angular, HTML5, CSS3, JavaScript, Responsive Web Design, Data Binding, Component-Based UI
Databases: MongoDB Atlas, Firebase Firestore, NoSQL Data Modelling
AI & Computer Vision: YOLOv8, OpenCV, Object Detection, Sensor Fusion, Prompt Engineering, ChatGPT, Gemini, GitHub Copilot
DevOps & Tools: Git, GitHub, CI/CD, Render (Cloud Deployment), Linux CLI, VS Code, PyCharm, Raspberry Pi (IoT), Microsoft Excel
Core Concepts: OOP, Data Structures, Operating Systems, Computer Networks, Agile, Debugging, Code Collaboration

WORK EXPERIENCE

Software Developer / Software Developer Intern — MINTS Global | Jul 2026 – Present

- Ship production features across 2 enterprise and security products, owning development, integration and testing through to delivery.
- Contributed to Mints ERP, helping take an internal solution to a commercially launched product used by external customers.
- Contributed to ShieldDesk, an AI-assisted security operations platform enabling real-time incident investigation through controlled, auditable workflows.
- Built the full admin section (1 of 2 modules) of an ERP task/kanban module (Next.js, Firebase) in coordination with the employee-side developer.
- Collaborate with a cross-functional team to integrate and validate features in iterative Agile cycles.

Front-End Development Intern — NeST Digital Academy | Mar 2025 – Apr 2025

- Built responsive, component-based interfaces with HTML5, CSS3, JavaScript and Angular using data binding and modular design.
- Delivered work in an Agile team using Git/GitHub for version control and collaborative review.

SELECTED PROJECTS

Smart Shopping Cart System (Cartify GnG) — FastAPI · MongoDB Atlas · Angular · YOLOv8 · OpenCV · Raspberry Pi

- Automated item identification and billing end to end by fusing 2 inputs (YOLOv8 detection + load-cell weight) on Raspberry Pi.
- Engineered a real-time FastAPI + MongoDB Atlas backend handling 4 core flows: cart events, item verification, dynamic pricing and cart sync.
- Delivered an Angular dashboard for live cart state and billing; deployed to Render with configured build commands and environment variables.

Grab & Go – Supermarket Assistant Web App — Flask · Firebase Firestore · HTML · CSS · JavaScript

- Co-developed a retail web app with real-time shopping lists, location-based in-store guidance and a live offers feed.
- Improved product detection reliability by fusing 2 sensor modalities (computer vision + weight).
- Built a RESTful Flask backend on Firestore for real-time cross-session sync, applying CI/CD principles.

Leo & Teddy — AI-powered YouTube Kids channel

- Founded and run an AI-driven animation channel, building the content pipeline with generative AI tools and prompt engineering.

EDUCATION

B.Tech, Computer Science and Engineering — Ilahia College of Engineering and Technology | 2022 – 2026 | CGPA: 7.25
Higher Secondary (XII), Computer Science — Vijaya HSS, Pulpally | 2022 | 76%
Secondary (X) — Vijaya HSS, Pulpally | 2020 | 94%

CERTIFICATIONS

Front-End Development with Angular – NeST Digital Academy | Introduction to Generative AI – Microsoft | Programming in Java – NPTEL (66%) | Python 3 Bootcamp – Udemy

ACHIEVEMENTS & LANGUAGES

- Participated in college-level hackathons and technology events, solving problems collaboratively under time constraints.

Languages: English (Professional), Malayalam (Native), Hindi (Conversational)
